Catalogue Entry for Mixlance (Technical Services) Limited

Mixlance (Technical Services) Limited

Stand H5

On show will be Mixlance's new low-level modular batch/coating/recycling plant incorporating the latest Pulse Jet filter.

This revolutionary plant is designed to produce small quantities of between 500kg – 3 tonnes with recipe-driven production being controlled by a core PLC/PC-control system. The plant has enabled Mixlance to become the first in the industry to secure grant funding from the European Commission's LIFE Environment Programme.

The new, fully clad batch heater is smaller, shorter, cheaper, faster, quieter and cleaner than rival plants.

A newly developed pulse-jet filter reduces emissions to less than 10mg/m₃. Energy consumption too, is significantly reduced, leading to extended filter sleeve life and improved filter reliability.

Mixlance (Technical Services) Limited, The Bank, 66-68 High Street, Measham, Derbyshire, DE12 7HR. tel (01530) 271333; fax: (01530) 271444; email: jed@mixlance.com
